

Forensic Science!

On the 13th of March, two year 5s and two year 6s went to a forensic science day at Birchwood High School. The activities were:

- Chromatography - the ink analysis
- Finger printing - recognising finger prints
- What is that white powder? - powder analysis
- Microscopy - fibre match up
- Soil analysis - universal indicator (a chemical)
- Bones to height - measuring bones (math)

It was an amazing day!

Rosie said, "My favourite parts were using the microscope and analysing the white powder."

James said, "I enjoyed analysing the soil for acids and alkalis."

Hannah said, "I enjoyed it. My favourite part was when we did the finger printing." By James and Harry (Y5)
